

# MEYRA OPTIMUS

## Mod. 2.622

With the **OPTIMUS** model, Meyra has designed a new model of chair for outside, with the traditional Meyra spirit and concept.

It is equipped with modern technology with microprocessor control functions. This chair is ideal for the street.

It is a very comfortable and powerful model and the ideal companion for outside. The standard model is equipped with manually-reclinable seat and back.

### All functions

All functions may be controlled from the panel: lights, horn, indicators, speed, load control, partial and total distance counter. The panel is concealed for easy table access. Optional: seat, back and footrest adjustment and inclination.

### Collapsible chair

The chair can be disassembled into two parts, thus easing mobility of transport. There is a compartment at the back for carrying objects.

### Easy access

There is easy access to the interior of the chair for proper maintenance.

### Drive

Front drive with larger-diameter wheels than the back give more power and cope easily with kerbs and irregular floors.

### Steering is from the back

meaning the chair can turn in short radiuses. This is a great benefit when moving outside.
