

EUR MEYRA CHAIR®

mod. 1850

Next generation maximum function and quality aluminium chairs.

Footrest

For this model, Meyra designed a new static and functional footrest. Platforms may be adjusted 4 cm forwards and backwards and may be set in 3 positions.

Brakes

The easy-to-use and perfectly-adjusted brake is designed so that there are no cutting edges which may injure the user.

Backstep

This has been manufactured to fit in with the chair's design.

Upholstery

The seat's upholstery is no longer screwed on to the tube but rather integrated into the seat by a bar. Seat stretch is therefore levelled off.
