Width (cm)	Ready to be driven	51	53	55	57	60	63
	Folded	30					
Length (cm)		87 cm with standard frame					
Height (upper edge of push handle) (cm)		80 cm with back height of 30 cm					
Height of the back support strap (cm)		30 / 35 / 40/45					
Seat depth (cm)		36 / 38 / 40 / 42 / 44 / 46					
Seat height (cm)		44 cm - 55 cm					
Drive wheel (inch)		24"					
Empty weight (kg)		12 kg					
Maximum user weight(kg)		120 kg					
Maximum permitted weight (kg)		132 kg					
Transport weight		from 7,5 kg (without drive wheels)					

Foldable

A system of direct fit to the chassis ensures good stability while offering easy handling very similar to high competition chairs manufactured with a rigid frame.

New appearance

The rear wheel can be assembled very close to the chassis to offer a new dimension by reducing the total width of the chair.

Quality of the material

The upholstery is composed of the highest quality materials and is available in two colours, blue and black. The tension can also be adjusted, making it even more comfortable and practical.

Design and functionality

The front part of the chassis is extended in a bell shape for greater functionality. The beauty of the materials used further enhances the design.
